

BUTTERNUT SQUASH CAZADOR

LARGE FRUITED HYBRID F1 BUTTERNUT SQUASH VARIETY SUITABLE FOR THE PROCESSING BUTTERNUT SEGMENT

- Large fruited variety with average fruit weight of 2 - 2.2kg
- Excellent shape and size uniformity
- Vigorous plant growth
- Very good flesh quality

Type
Processing segment
Maturity
Medium to late: 95-100 days from sowing.
Plant Characteristics
Vigorous plant with vining growth habit.
Variety Characteristics
<ul style="list-style-type: none">• Large fruit with average fruit size 2.0kg.• Excellent shape and size uniformity.• Very good internal fruit quality.• Small seed cavity.• Tanned coloured skin.
Features & Benefits
High yielding variety with excellent flesh recovery rate. Fruit shows very little ribbing.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
