

LETTUCE GREGORIO

NEW MULTI-BUTTER LETTUCE

- Deep triple red colour
- Excellent uniformity
- Year round production
- Exceptional bolting and tip burn tolerance
- Robust disease resistance package

Type

Triple red multi-butter with high colour penetration. Ideal for salad mixes.

Maturity

Approximately 30 - 45 days in summer, and 50 - 60 days in winter. (Maturity is dependant on area and climate, these are approximate days)

Plant Characteristics

- High usable leaf count
- Very good bolting tolerance
- Adaptable for open field and hydroponics
- Abundance of small uniform leaves with red penetration and gloss

Features & Benefits

- BI: 29 0 39 EU (HR)
- Nr: 0 (HR)
- TBSV (HR)

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
