

# BUTTERNUT SQUASH LAYLA

## PROCESSING-MARKET F1 HYBRID

- Good fruit uniformity
- High yield potential
- Fruit size average: 2.2-2.4kg
- Excellent flesh quality

### Type

Processing-market butternut squash.

### Maturity

Medium-to-late: 95-105 days from sowing.

### Fruit Characteristics

Large sized fruits with good shape and size uniformity.

### Plant Characteristics

The plant growth habit is vining with good vigour.

### Features & Benefits

Layla is ideal for the processing market due to large, uniform fruits and a high yielding potential.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
