

ONION NYALA

MAIN SLOT SHORT DAY F1 HYBRID ONION VARIETY WITH EXCELLENT QUALITY AND YIELD POTENTIAL

- High yield potential with disease resistance
- Tight straw-colored skins
- Excellent quality bulbs
- Highly adaptable variety.

Type

Main short day onion segment

Plant Characteristics

Upright, vigorous foliar growth with high Pink Root resistance.

Variety Characteristics

Bulb Characteristics: High yield potential with excellent uniformity of globe shaped bulbs. Tight straw-colored skins.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
